

Pharma-sulation

BiOCS's Pharma-sulation is the insulation of choice for pipe, vessel and duct using cutting machinery with melamine resin, BASOTECH® paired with PVC cover.

We can custom cut to any shape or size to meet customers' specialty requirements.

Resulting from the basic melamine resin:

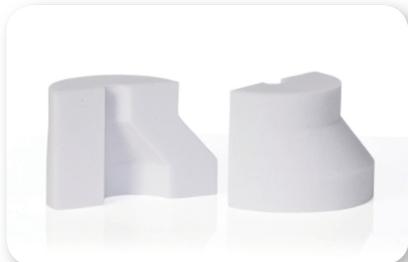

- Flame resistance
- High temperature resistance
- Constant physical properties over a wide temperature range
- Abrasiveness

Resulting from open cell foam structure:

- Low weight
- Good thermal insulation property
- Flexibility at very low temperature
- High sound absorption capacity

Pharma-sulation products

Pharma-sulation offers a variety of melamine foam insulation. There are many different types and applications for our products.

Properties of BASOTECH®

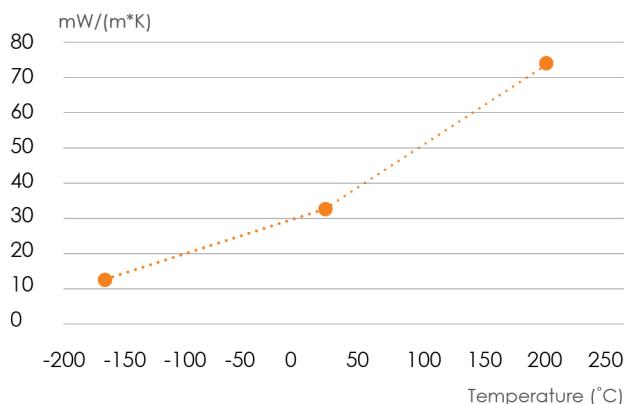

Flame Resistance
Germany / DIN 4102-1, B1
USA/ UL 94, V-0

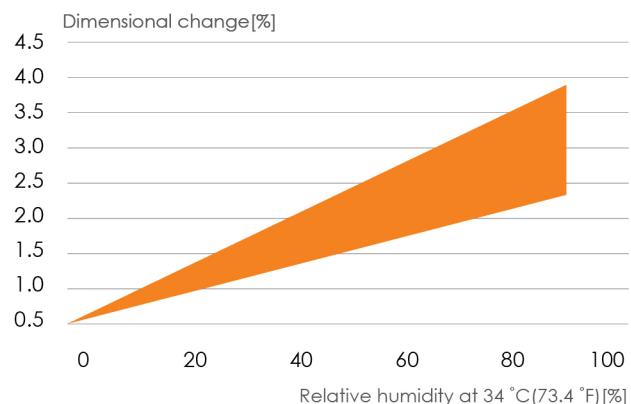

Flexibility at very low temperature
Constant physical properties over
a wide temperature range
DIN EN ISO 2578

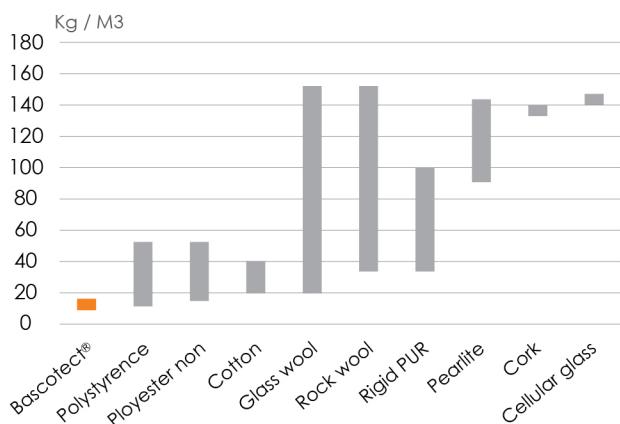

Good Thermal Insulation Properties

Volume Change by Humidity

Light Weight

High Sound Absorption Capacity
