

Hygienic Solution for Clean Room and Process-area Electrical Installations

Manufacturers of Patented Hygienic Stainless Steel Cable / Pneumatic Containment Systems

What is Hycon®?

- > Hycon® is a modular, hygienic stainless steel cable containment system
- > Hycon®-O is a fully-sealed waterproof system with an IP66 rating
- > Hycon®-S is a semi-sealed system

Advantages of Hycon®:

- > U.S. patented technology
- > 316 Stainless Steel grade material
- > Quick assembly and modular design enables substantial cost savings
- > Suitable for full-wash and neutral to contamination
- > No comparable system available in stainless steel
- > Hygienic installation qualities
- > Facilitates good GMP

Designed for use in:

- > Pharmaceutical Plants
- > Clean Room Environments
- > Chemical Plants
- > Food-Processing Plants
- > Harsh Environment Installations

In accordance with European Standard EN -IEC 61386-1 AND ** IEC 61386-21, IEC 61386-22, IEC 61386-23, IEC 61386-24 and/or IEC 61386-25, "STAINLESS STEEL CONDUIT" or "STAINLESS STEEL CONDUIT FITTING" [18EC]

DUNREIDY ENGINEERING LIMITED
Classification Coding: 444411664414

“ Hycon® is a very good product and the Lilly project is the cleanest look of installation I've done. Also, the new connectors and couplings make the cable pulling easier. I personally think Hycon® is the future for cleanroom installations.

Travis Schaf,
JOURNEYMEN ELECTRICIAN, IBEW LOCAL #481.

“ The main sectors currently using our products are from the Pharmaceutical, Chemical and Food & Beverage Industries. We supply all the top pharmaceutical companies worldwide for new installations and upgrading of existing plants.

Donal Dunne,
